

For IMMEDIATE RELEASE:

THE RAIL SAVER, By TG PRODUCTS – INNOVATIVE BOX RAIL REPAIR TOOL WILL CHANGE THE WAY COLLISION REPAIR SHOPS REPAIR FRAME RAIL DAMAGE

Folsom, CA November 12, 2009 – TG Products debuts The Rail Saver and wins 3rd Place BEST NEW PRODUCT in the New Product Pavilion at NACE Expo 2009 last week. This innovative new system to repair damaged side member and frame rails impressed everyone from Collision Repair Technicians to Owners to Jobbers and Distributors in the industry. Designed by an auto body technician this patent pending technology allows you to measure, insert and repair quickly, easily and accurately. It converts your 4 ton ram into a powerful box rail repair tool that will reduce cycle times and allow your shop to repair more cars with improved repair technique.

Designed by Tim Gerhards, Auto Body Technician and business owner, The Rail Saver is uniquely designed to repair rails fast from the inside out so you don't have to spend time drilling and cutting access holes only to weld them back together. It repairs rails using your 4 ton ram (not included) concentrated into a 1/4" area and reaches up to 27" deep with 1 1/2"X3" surface pressure and 1 3/8" travel.

The Rail Saver does exactly what it promises according to Ted Mendelson, Body Shop Owner. This is the second 1/2 of a story of how they saved a Lexus from being totaled. "...he used the rail saver to repair the left frame rail in 3 hours. It worked perfectly. No cutting holes in the other side of the rail. No fighting with the rail with limited access due to the engine still being in the car. Thanks again for inventing the rail saver. It really works."

SAVE A RAIL, SAVE A TOTAL LOSS, INCREASE YOUR BOTTOM LINE. At just \$350 retail, it is completely affordable for every collision center and it will likely pay for itself in the first use. The Rail Saver is currently being sold by TG Products and select tool companies. Distributors and resellers are welcome and should contact the company directly. "I have always been dissatisfied with the lack of travel and access that short hydraulic rams and pads had to offer. The Rail Saver has been years in the making. This is just the first of many new products to come." Tim Gerhards, Auto Body Technician.

TG Products was formed to bring innovative auto body repair tools and equipment to the collision repair industry. Tim Gerhards has been an auto body repair technician for the past 22 years. For the past 8 years he has been inventing auto body tools and partnered with Steck Manufacturing to bring his products to market. Some of the products marketed through his partnership include SkinZipper, Mig light, Workstand Clamp, EZ Strip II, Panel Shapers, and handy Pull Kit.
